DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 4-10, 16-23, 25-29, 35-46, 48-52, 54-60, 62-67, 69-94 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-54 of U.S. Patent No. 6,735,879. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the subject matter claimed in claims 1, 2, 4-10, 16-23, 25-29, 35-46, 48-52, 54-60, 62-67, 69-94 in the instant application are claimed in claims 1-54 of the patent.

For example, claim 1 of this application claims: a line generating device, comprising: a housing; a light source mounted within the housing; a power supply connected to the light source; a projection lens that receives light and projects the light in the shape of a fan; at least one reference level on an outside of the housing; and a pin that is movable from a first position, wherein the pin is incapable of contacting a surface exterior of the line generating device, to a second position wherein the pin is capable of contacting the surface; these limitations are claimed in claims 1-54 of the US Patent. The same reasoning holds for the rest of the

Art Unit: 2859

independent and dependent claims 2, 4-10, 16-23, 25-29, 35-46, 48-52, 54-60, 62-67, 69-94 of this application.

Allowable Subject Matter

3. Claims 3, 11-15, 24, 30-34, 53 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

- 4. Applicant's arguments, see Amendment and Remarks, filed August 30, 2004, with respect to the prior art rejections have been fully considered and are persuasive in view of the amendments to the claim. The prior art rejections of claims 1-15, 17, 19-22, 24-33, 36-39, 46-56, 61-66, 68-72, 74-79 has been overcome.
- 5. Regarding Applicant's arguments that the rejection under obviousness-type double patenting was premature, Examiner disagrees that the rejection was premature. The obviousness-type double patenting rejection was applicable and therefore, was given in order to expedite prosecution of the application. The obviousness-type double patenting rejection is still considered applicable and therefore, the current rejection is made final.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2859

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy R Cohen whose telephone number is (571) 272-2238. The examiner can normally be reached on 8 am - 5 pm, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego F. Gutierrez can be reached on (571) 272-2245. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
